AUTUMN

2012

Season: AUTUMN 2012

This book is a real innovation within the extremely rich scene of Spanish and Galician cookery, a work that will open the reader's eyes to a world of new sensations, tastes and textures. The most imaginative example of New Galician Cuisine, it is a proper treatise on the nettle as an ingredient with exceptional qualities for both sweet and savoury dishes, exquisite in vegetables with scrambled eggs, empanadas, soups, vegetable stews, ice cream... The nettle is a herb that today is largely ignored but which was used by the Romans and possesses medicinal qualities: it stimulates the digestive system, fights rheumatism and anemia, and is a restorative diuretic.
