2012

Season: AUTUMN 2012

This is the story of a seductive and greedy carnivorous plant, who lures all kinds of insects with her charms and devours them incessantly. In the world of carnivorous plants there are many species. Tita belongs to a group called "Venus Flytraps" and her scientific name is Dionea. Seductive and irresistible, these plants have been given the nickname Venus in honour of the Greek goddess of love and beauty. We can delight in this beauty thanks to the illustrations of Poly Bernatene. The book is written in verse and rhyme by the Argentinian Paula Fernández and Poly Bernatene. Tita, the Wicked Plant is a children's story, for children from the age of 6.
