Genre: Others

AUTUMN

2012

Season: AUTUMN 2012

This book is a sincere homage to all those whose effort, tenacity and scant resources made it possible for aviation to become the most secure form of transport. Everyone who sits down to read this book will find themselves in a world full of gripping biographies, research, anecdotes and curiosities which will undoubtedly delight both those already familiar with aeronautics and those who are coming into contact with it for the first time. Through the engaging text and charming images, we come to know the lives and the main achievements of the men and women who made it possible to realise the ancient dream of flying.
