Genre: Others

AUTUMN

2012

Season: AUTUMN 2012

When parents and children start their lives together there is always a host of doubts, which in the case of adopted children have special significance. The questions about where a child comes from, the parents' fears, emotional difficulties that might arise, the possibility of additional problems during the learning process... In a highly informative style in which they pose questions that are then answered in great detail, the authors cover a wide range of topics up to adolescence and which include, among others: the arrival of a biological child after adoption; relationships with school friends; explanations that adopted children need to hear one day; and how to deal with physical differences to the adoptive family.
