SPRING

2014

Season: Year 2014

What would happen if one day you photographed something you shouldn't? Something as simple as going out to take pictures of the rain or anonymous people who exude a photogenic quality could change your life. This is the story of an amateur photographer who only wanted to be an anonymous observer and look at the world through the lens of her camera. But a series of events show her that it's not always possible to pass unnoticed nor to go out into the world without it affecting you, or it affecting you.
