Pages: 68

ISBN: 978-84-9736-188-0

Genre: Others

AUTUMN

2010

Season: AUTUMN 2010

Paper folding, or origami (oru: fold, kami: paper) is the ancient art of representing the things we see around us by making folds in paper. Origami is first and foremost a pastime and a diversion. Furthermore, working with our hands helps to develop our skills. We all have the inner potential for creativity, imagination, expertise and composition: to bring these talents to life, we just need some paper and a bit of patience. Origami will take care of the rest.

Publishing rights available from **Company:** LIBRO HOBBY CLUB, S.A.

Additional information Prizes and reviews:

Rights sold (but now available) in Mexico, Colombia and Portugal. Co-publications also produced in different languages of the Spanish State: Galician, Catalan. An innovative method of illustrating folding which, as well as using recognised symbols, also includes detailed descriptions of each step, accompanied by abundant and colourful illustrations which use shading to differentiate between the front and back of the paper.
