Genre: Literature

SPRING

2017

Season: Year 2017

The focus of this book is preventing bites (from dogs to children). We know that any child-dog incident can have serious consequences for the human, resulting in a complete loss of confidence in the dog (which can lead to a change in family and/or greater consequences). This book equips small children with the basic rules for living with their pets. It's an informative and entertaining guide showing the children of the house how to get on with dogs in a respectful, safe and fun way. Activities are included as well as a brief guide to help parents and educators to apply canine language and avoid regrettable incidents.
