

Guía del instalador de energías renovables

Author: [Tomás Perales Benito](#) [1]

Publisher: [Creaciones Copyright](#) [2]

Year of Publication: 2008

Pages: 262

ISBN: 978-84-96300-70-5

Genre: Scientific Technical

AUTUMN

2009

Season: AUTUMN 2009

Demand for photovoltaic and wind equipment to obtain electricity and thermal facilities for heating and hot water, grows by the day around the world. Installers who previously only dealt with classical electrical installations now need to be trained in these new techniques and this book is ideal to help them. The success of this book lies in its practical approach.
