Interestelania recounts the journey of Camila, a very curious little girl who wants to learn about her surroundings. Her father, who happens to be an inventor, sends her to space on a voyage that will take her to unknown worlds. Those worlds were conjured up in the imagination of my daughter and her friends, on the afternoons they spent together in the park. They created the worlds that appear in the book. Without a doubt, the tremendous job my partner María Padilla did with the illustrations has helped to unify those concepts in a beautiful and profound book. Its ending is particularly moving.
