Paula is a Spanish dancer who has recently arrived in Seoul with a failed dream: the city isn't what she'd expected and the person she had most longed to see has betrayed her. Cris is a young British girl with a single mission: to return the earring of a K-pop star she met in England, and that's why everything goes wrong... But she has to return the earring soon because the problem she's hiding from Dani and his new workmate, Minwoo, is about to explode. Jay is the star, and he Hyunsoo, Alex and Young form the band R*E*X, which has millions of enthusiastic followers. What very few people know is that the members of the band aren't getting on well together and a secret threatens to destroy everything they have fought to achieve. From Seoul to the Sky is the first Spanish novel to explore this huge phenomenon.
