SPRING

2019

Season: Year 2019

This story recounts half a century in the history of a small city in the north of Spain, from the postwar period in which the protagonist arrives there to work on the railways, up to the present day. Successive generations witness such major events as the fire that engulfed the city. Love, children, and destructive forces of Alzheimer all play a part in a novel that is charged with emotion from start to finish.
