2021

Season: Year 2021

TATI is the guardian of the sea. TATI lives a quiet life until the day she discovers that her friends, the fish, have disappeared due to the damage done to the sea by human beings. At that moment she decides to intervene in the lives of humans to put things back to how they were. This is the first title in a collection of eight rhyming books for young children that teach them the importance of taking care of the planet through the stories of magical beings called the Guardians of the Earth. The purpose of these characters is to protect the planet Earth from the neglect caused by human beings. Each title focuses on a different issue that is endangering our planet.
