2009

Season: AUTUMN 2009

Architecture not only manifests itself in the form of buildings but also as interventions born of their context. Our inextricable

connection to nature has always prompted architects to intervene in the landscape as a way of marking, preserving or enhancing our surroundings and our relationship to them. This volume showcases a selection of contemporary structures inspired by the experiences derived from our interaction with the landscape—looking, walking and bathing—as proof of how architecture can both respectfully and elegantly strengthen our bond with nature.
