SPRING

2011

**Season:** SPRING 2011

SAP Netweaver Business Warehouse (SAP Netweaver BW) is the analytic, informational, multiplatform data warehousing solution of SAP AG which allows data to be extracted rapidly and effectively from both SAP and non-SAP sources thanks to its pre-defined business content and the combination of tools which make up the Data Warehousing Workbench (DWW). It also allows us to explore the client tools: BEx Suite, currently in the process of being transformed after SAP's acquisition of Business Object.
