Year of Publication: 2009

Pages: 220

ISBN: 978-84-370-7325-5

Genre: Others

AUTUMN

2009

Season: AUTUMN 2009

With a great sense of humour, the texts that constitute this book deal with very different scientific topics: statistical lies, the determinist chaos, the globalisation of communications, the dangers of computing, or mathematical questions around prime numbers. The author also resorts with an exceptional amenity to topics very typical of biology such as the discovery of DNA, the use and abuse of virus, psychology in marketing techniques or lie detectors.
