If you are one of those boring people who thinks that reading fantasy novels is a waste of time, then don't read this book, because you will not like it at all. Anyone who delves into the book and accompanies the protagonists in the difficult challenges they have to confront will find intrigue, adventures, and friends who investigate mysteries, monsters and fabulous creatures.

There is still time to leave this book on the shelf and look for another about people to whom nothing extraordinary or unexpected ever happens.

This book only talks of silly things like intelligent heroines with loyal and brave friends, wicked villains, even more wicked stepmothers, one or two princesses, bold knights, castles, sinister forests, carnivorous daisies... and possibly even some wizards.
