2011

Season: 2011

Emilia is swimming in a sea of confusion. She feels like a stranger to herself. She doesn't know what to grab hold of. Will she be able to cope on her own if she decides to split up her marriage? However complicated her life, she has an inner strength she was completely unaware of and friends who help her to keep on and to feel that life is worthwhile.

"Tengo pies" ("My Own Two Feet") is a women's story that reflects the psychological difficulty many women in our society face when they separate from a partner and how hard it is to live alone. It deals with love and the lack of it and above all with the value of friendship, with all its flaws and marvels. This is a novel for people, whatever their gender.
