AUTUMN

2011

Season: AUTUMN 2011

Fishing flies are a world unto themselves.

This book presents a broad range of flies for catching trout and salmon, using the latest materials available on the market alongside some traditional ones. This means that man-made flies look more and more like real insects and so are more effective.

In the company of expert anglers, with many years' experience, we present 63 trout flies and 25 for salmon, covering all fishing possibilities. They are practical, effective flies. The process of making each of them is explained step by step, in high quality photos and texts. We are also shown how to use them
