Twelve lives in a city which is determined to destroy them . A court of fantastic beings divided between keeping them alive and abandoning them to their fate. And all of them awaiting the arrival of the Red Moon which will unleash the time of nightmares ...and miracles.

This is the king's last hope, the only chance left to Rocavarancolia to recover lost glory. But it is a fragile hope: in thirty years not one of the young people brought there has survived long enough to be of any use. In thirty years not one has survived to see the Red Moon.
